BEST FROM WASTE

PREPARATION OF ECO-FRIENDLY MATERIAL USING WASTE MATERIAL

Recycling and reusing the waste material can result in fantastic and usable products. Rather than putting these waste materials into the landfills, various innovative and creative ideas can be put together to being something new and useful.

OBJECTIVES

- To develop the ability to think and organize the thinking to create something useful.
- To indulge the students into a extracurricular activity with exclusive tool i.e. waste material.
- To explore the environmental concepts and actions which are beyond the curriculum & syllabus?
- To make our vision and outlook broader about the nature & society.
- To control the harmful effects of waste on our environment.
- Create awareness among students to use the waste products in best possible manes.
- Various things can be put to different uses.
- More of awareness and efforts combined together to make variety of products.

Advantages /uses

- Helps in generating the awareness and building the attitude to take up activities in real would.
- Controlling the amount of waste send into landfills.
- Enables the students to give this creativity & innovation a shape.
- Reduces the destruction of forest & other eco – system.
- Helping the society and nation in conserving our nature.
- Keeping our planet a much safer place for coming generation.
- Developing the sense of using ecosystem.
