## **Institute Vision**

To be a premier institution in technical education by creating professionals of global standards with ethics and social responsibility for the development of the nation and the mankind.

## **Institute Mission**

- ★ Impart Outcome Based Education through well qualified and dedicated faculty.
- ★ Provide state-of-the-art infrastructure and facilities for application-oriented research.
- ★ Reinforce technical skills with life skills and entrepreneurship skills.
- ★ Promote cutting-edge technologies to produce industry-ready professionals
- ★ Facilitate interaction with all stakeholders to foster ideas and innovation.
- ★ Inculcate moral values, professional ethics and social responsibility

## **Quality Policy**

RISE Krishna Sai Prakasam Group of Institutions is committed to impart outcome-based quality technical education as per the growing needs of the society on a continual contact basis and continually improved services. We shall protect the interests of our students and prepare them to meet the growing challenges with increased ability to serve the nation

### **Mentoring System and Guidelines:**

Counseling is the primary tool to find the problems faced by the students and to offer solutions comprehensively. The institution has appointed a professional psychological counselor who visits the College and gives counseling to the students in distress, in privacy. If required, parental counseling is also provided. Counseling is also given by other professional experts and experienced Members of the faculty who look after the welfare of the students by helping them to cope up with stress. The students are instilled with confidence to face the highs and lows of their life. The Members of this committee also tell them how to overcome the challenges troubling them, without fear and apprehension.

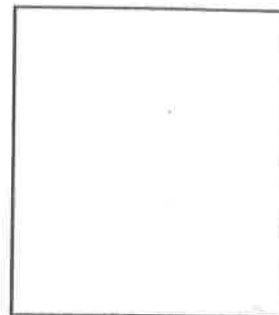

### **Types of Mentoring:**

- Professional Guidance
- Career Advancement
- Course Work Specific Guidance
- Laboratory Specific Guidance
- Personal Guidance
- Guidance for the All Round Development

### **Counseling Procedure:**

- An effective Student mentoring system is being implemented in our college.
- Right from the day one of their admission the students come under the above mentioned system.
- A complete track of student activities like Academic, Curricular, Co-curricular and Extra-Curricular achievements, Social activities and the details of Parent Meetings are registered in the system.
- A Counseling Record is maintained by the faculty. 20 students will be allotted to each mentor. They check the student's academic progress on a regular basis and discuss with student.
- Counseling is given to the student when any discrepancies are observed in student behavior, attendance, academic performance, participation in academic and nonacademic activities etc. The faculty will submit the counseling record to a high level Mentoring / Counseling committee which includes the Members, HOD, and the Principal.
- If needed the committee will have a discussion with the Parents and Medical Counselor.

**Program Outcomes :**

<b>PO1</b>	<b>Engineering knowledge:</b> Apply the knowledge of mathematics, science, engineering fundamentals, And an engineering specialization to the solution of complex engineering problems.
<b>PO2</b>	<b>Problem analysis:</b> Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of Mathematics, Natural Sciences, and And Engineering Sciences.
<b>PO3</b>	<b>Design/development of solutions:</b> Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
<b>PO4</b>	<b>Conduct investigations of complex problems:</b> Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
<b>PO5</b>	<b>Modern tool usage:</b> Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
<b>PO6</b>	<b>The engineer and society:</b> Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
<b>PO7</b>	<b>Environment and sustainability:</b> Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
<b>PO8</b>	<b>Ethics:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
<b>PO9</b>	<b>Individual and team work:</b> Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
<b>PO10</b>	<b>Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
<b>PO11</b>	<b>Project management and finance:</b> Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
<b>PO12</b>	<b>Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

**Program Outcomes :**

<b>PO1</b>	<b>Engineering knowledge:</b> Apply the knowledge of mathematics, science, engineering fundamentals, And an engineering specialization to the solution of complex engineering problems.
<b>PO2</b>	<b>Problem analysis:</b> Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of Mathematics, Natural Sciences, and And Engineering Sciences.
<b>PO3</b>	<b>Design/development of solutions:</b> Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
<b>PO4</b>	<b>Conduct investigations of complex problems:</b> Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
<b>PO5</b>	<b>Modern tool usage:</b> Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
<b>PO6</b>	<b>The engineer and society:</b> Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
<b>PO7</b>	<b>Environment and sustainability:</b> Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
<b>PO8</b>	<b>Ethics:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
<b>PO9</b>	<b>Individual and team work:</b> Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
<b>PO10</b>	<b>Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
<b>PO11</b>	<b>Project management and finance:</b> Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
<b>PO12</b>	<b>Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change
