THE CONTENT OF MODULES FOR LANGUAGE AND COMMUNICATION SKILLS PROGRAMME

A.Y:2019-20

II- B.Tech

LANGUAGE SKILLS

When we learn our native language, first we listen, then we speak, then we read and finally we write. Listening, speaking, reading, and writing are the four language skills we need to develop for complete communication. Listening and reading are accessible input, i.e., the action of gaining language components inside. Speaking and writing are creative output, i.e., the action of constructing language as part of the progression of second language learning.

BODY LANGUAGE

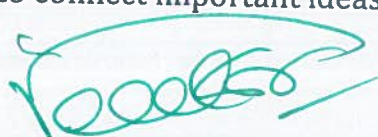

Body language is the use of physical behavior, expressions, and mannerism to communicate nonverbally, often done instinctively rather than consciously. Whether you are aware of it or not, when you interact with others, you are continuously giving and receiving wordless signals. All people express their body language in one of four ways; a light and bouncy movement, a soft and fluid movement, a dynamic and determined movement, or a precise and bold movement. Positive body language in a classroom setting could motivate, inspire, and engage. It can not only give the confidence to students to speak but also reassure the students about what they are talking.

GROUP DISCUSSION

Having group discussions in the classroom is not only beneficial for students' social skills, but also their educational development and learning too. One way the faculty member can use group discussion to improve learning is to ask open-ended questions. Doing this will encourage critical thinking and help students think for themselves. Not only this, group dialogue can also be used to improve learning as it can encourage students to become more confident at speaking up and asking questions. This will help them improve their learning overall because it should make them more confident. Another way it improves learning is that group discussion invites students to be the main speakers, not just the teacher.
